Application/Control Number: 10/773,944

Art Unit: 2614

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6-9, 12-15 and 18 are rejected under 35 U.S.C. 102b) as being anticipated by Lawton.

The system of Lawton (noting particularly Figs. 1a-1c and 16-22) involves encoding a test pattern in the image portion of a video signal (as shown in Figs. 1a-1c and 17), wherein the embedded test pattern survives a subsequent decrease in resolution (Lawton discloses changing the spatial frequency of the background image: step S54 in 16-2), and increasing and decreasing the luminance on N adjacent lines in a prescribed pattern (Figs. 16-1, 18, 20) that does not affect the image perceived by the human eye, thereby meeting claims 7 and 13.

As for claim 1, the embedded encoded data can modified to the point of becoming subliminal.

As for claims 2, 8 and 14, the entire line is changed in the same way since the spatial frequency can be changed for the whole image.

As for claims 3, 9 and 15, the luminances can vary according to a sinusoidal function (noting Fig. 18).

As for claims 6, 12 and 18, for each of N lines foe which the luminance is increased a selected amount, there is a corresponding line for which the luminance is decreased (so characterized by contrast).

Application/Control Number: 10/773,944

Art Unit: 2614

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4, 5, 10, 11, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lawton.

As for claims 4, 10 and 16, would have been obvious to apply a sawtooth wave function to the luminance of the plural lines since a sawtooth is similar to a sinusoid, and since Lawton allows for varying both the spatial frequency and contrast in an extensive selectable manner.

As for claims 5, 11 and 17, since contrast can be applied to plural lines, it would have been obvious to apply it constantly as if following a sawtooth function.

- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor R. Kostak whose telephone number is 703 305-4374. The examiner can normally be reached on Monday Friday from 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Miller can be reached on 703 305-4795. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 2614

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Or faxed to:

(703) 872-9306 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 308-HELP.
